That's correct Sasha

Are you only interested in slurry? We've just had a couple of papers published on ammonia from dung and urine application and urea so the data is available??

Also one on Friday with alum, FeCl and poly aluminium chloride added to slurry....

Regards

Gary

Subject: Question on crops in ALFAM data

Dear Gary,

I have a simple question on your ALFAM data. Can you clarify the crop type (column BO)? I think rows 226 - 351 (publication 2) should be winter wheat, and rows 352+ grass. Is this right?

We are making a lot of progress on data analysis and model development, despite coming across small errors once in a while.

Best regards,
Sasha
