**Onderwerp:** Re: set 2

Hi Wim,

No problem. Thank you for getting and sending these data. I can only think of one more question: where can I find data on the NH<sub>4</sub>-N content of the applied slurry? I understand that column 6 (NH<sub>4</sub>-N kg/ha) is incorrect in the Tables 2 and 3 in the 1994 paper. Is it correct that these numbers are actually slurry NH<sub>4</sub>-N in kg/m<sup>3</sup>? If so, that is all I need. Otherwise, do you have an electronic copy of your PhD dissertation you could send?

Best regards,  
Sasha

Hi Sasha,

I am terribly sorry but I forgot to deliver the weatherdata.

You get 2 mails from me.

In the word file the weatherdata are explained (dutch and english

Do you have now all info?

I do not know exactly when all experiments have started but usually it would be between 9 and 10

Met vriendelijke groet,  
Wim Bussink
